Via fax: 9 pages transmitted

Please find attached your approved Form E369, *Application to Transact Non-Bonded Carrier Operations at Point of Arrival in Canada*. Your authorization and carrier code number is **7GI6**. Please note that non-bonded carriers cannot lend their carrier code to another carrier. Also, if you decide to become a bonded carrier, we will cancel your non-bonded carrier code within 30 days of issuing your new bonded carrier code.

The carrier code forms the prefix in your bar code. The bar coded cargo control number consists of your four digit carrier code followed by a carrier assigned sequence of letters and/or numbers that you choose. The carrier assigned sequence should be approximately 4 to 10 digit long, excluding your carrier code.

If you are clearing Customs with the Pre-Arrival Review System (PARS), the bar coded cargo control number goes on the invoice or bill of lading. If you are reporting to Customs using Release on Minimum Documentation (RMD), and Form A8A(B), Canada Customs Cargo Control Document, the cargo control number is bar coded on all five pages of the form. Refer to the attached carrier code requirements document.

The next step is for you to have bar coded labels printed within the next 30 days of issuance of your carrier code. After the 30 days, if the carrier does not use his bar coded labels when arriving at the Canadian border, an administrative penalty of a \$1000.00 will be imposed to the carrier.

For your convenience we have attached a list of printing companies who have had clients with positive bar code testing. If you wish to print your own bar codes, the bar code specifications (Customs Memorandum D3-1-1, App. H) are available on the Internet at www.cbsa-asfc.gc.ca/carrier under "Additional Information" or by facsimile at 613-957-9717.

If you require information on PARS process, contact Betty Lou Daye at 613-952-5092. For any other information, please do not hesitate to contact me at (613) 946-4278.
